

RAPTOR

Brad Nailers

The **OMER 12P.25H** series brad nailers drive the full range of RAPTOR® B/18 18Ga composite brad nails from 7/16"/11 mm through 1"/25 mm lengths. The 12P.25H has an added feature that prevents firing if the magazine is empty. The compact design and light weight make for ease of use all day long. Additional features include a comfort grip, safety trigger, rear exhaust and an easy top-load design.

For maximum efficiency, the **OMER 12P.25 CL4-1** has a magazine as long as its name! It holds more than double the brads of the standard magazine to reduce re-loading and it accepts all RAPTOR® brad lengths. Equipped with a remote trigger, this tool is designed for mounting on CSE automated systems and is used primarily for cabinet doors.

The **OMER 12.20P** brad nailer drives RAPTOR® B/18 18Ga composite brad nails from 7/16"/11 mm through 3/4"/20 mm lengths.

The narrow noses of these tools allow for superior nail placement in hard to reach areas and corners.
